

Product: Datalogic Formula Wizard, 732, 734 and 725

Product Bulletin Number: PBDLM-090705_RevB

Distribution Date: July 05, 2009

Datalogic Formula Restructuring

The Datalogic Formula 700 Series is being streamlined in two ways. First, the number of available models/configurations is being radically reduced to better tailor this product line to market demand. This includes the discontinuation of the Formula RF models and the Wizard Kits. Second, the product is transitioning from a kitted approach to an “a la carte” product line. This change implies that devices, docks and power supplies will be sold separately. The following items will remain in the Datalogic Formula 700 Series product line.

Ordering Information

Part Number	Model	Material Description
<i>Main Models</i>		
941504190	F734-E 1024K Pocket Terminal	Datalogic Formula 734-E, Batch, 1MB RAM/512KB Flash, 25-key Alpha-Numeric, Std Laser

Discontinuation

The following Formula 700 Series items will be discontinued. The “Discontinued Part Numbers” chart below lists the affected model and offers a “Recommended Replacement” where possible. Customers are encouraged to consider the Datalogic Memor or Datalogic Skorpio as an additional alternative for RF capability.
